----------------------	--	--	--	--	--	--	--	--	--

6 C2.1 Pricing assumptions

The Price List is in two parts. Part 1 is for work described in the Scope not requiring the *Client* to issue a Task Order. Part 2 is for work to be carried out on a Task-by-Task basis and instructed by Task Order. The *service* may comprise work under Part 1 only or Part 2 only or a mix of both.

Entries in the first four columns of Part 1 of the Price List are made either by the *Client* or the tendering contractor. Entries in the first four columns of Part 2 of the Price List would normally be made by the *Client* as the Party most likely to know the kind of work which will be instructed by the issue of Task Orders. The tendering contractor then enters a rate for each item and multiplies it by the expected quantity to produce the Price to be entered in the final column.

If the *Contractor* is to be paid an amount for the item which is not adjusted if the quantity of work in the item changes, the tendering contractor enters the amount in the Price column only; the Unit, Quantity and Rate columns being left blank.

If the *Contractor* is to be paid an amount for the item of work which is the rate for the work multiplied by the quantity completed, the tendering contractor enters a rate for each item and multiplies it by the expected quantity to produce the Price, to be entered in the final column.

If the *Contractor* is to be paid a Price for an item proportional to the length of time for which a service is provided, a unit of time is stated in the Unit column and the expected length of time (as a quantity of the stated units of time) is stated in the expected quantity column.

All Prices are to be shown excluding VAT unless instructed otherwise by the *Client* in Tender Data or in an instruction the *Client* has given before the tenderer enters his Prices.

The rates and Prices entered for each item includes for all work and other things necessary to complete the item.
